PRESS RELEASE

Cleveland Tank Has Moved

All-new state-of-the-art facility increases production capabilities, inventory capacity and much more.

September 6, 2024

Cleveland Tank is excited to announce that we have officially relocated to a brand-new state-of-the-art facility! Our previous building lacked the capacity and capability to meet our growing needs. As a result, we built a new 60,000 sq.ft. facility in Bedford, Ohio to expand our operations and accommodate our growth.

An investment of this size and significance presents new opportunities to our customers. Production capacity will increase, allowing us to manufacture more tanks. It will also enable our production team to build larger tank quantities for our original equipment manufacturers (OEMs), bigger tanks for plus-sized applications and take on additional unique tank projects.

With an increase in production capacity, we will also be able to improve upon our already industry-best lead times. The ability to manufacture more diesel and hydraulic tanks with shorter turnaround times gives us a major advantage over our competitors.

Cleveland Tank's new facility also more than doubles our inventory space, increasing the number of aftermarket tanks and tank accessories we have readily available in-stock for immediate shipment.

The new "Tank" headquarters will also better equip us to serve our customers. Engineering services have expanded to increase our OEM capabilities and aftermarket tank offerings. Our enlarged shipping and receiving department have increased the number of tanks we package and ship each day, and the expanded powder coating line accommodates larger tanks and has increased our coating speed capacity.

Our new facility can be found at the following address:

Cleveland Tank & Supply
15 Hemisphere Way
Bedford, OH 44146

Please note, all other existing contact information will remain the same. This includes phone and fax numbers, phone extensions, emails and website.

We are very excited about all the new opportunities our new building provides for our customers and look forward to the next chapter of Cleveland tank. Please feel free to contact us with any questions you may have.

Visit our website to learn more about Cleveland Tank's new building, view pictures and more!
